

Appellate Manager for Laserfiche®

Cities Digital's Appellate Manager Integration for Laserfiche® is a tool designed to simplify the packaging and sending of case documents for an Appellate Court Case. The Appellate Manager allows users to easily look-up and select case documents and package them together while automatically creating a cover page and table of contents with the appropriate header information.

The tool applies an appropriate template to the newly created document and archives it in a specified location in Laserfiche®. The Appellate Manager Tool makes the packaging and sending of documents for an Appellate Court Case quick and easy. Its robust features can:

- **Dramatically reduce the time required to compile and digitize appellate document packets.**
- **Reduce the burden of a paper-heavy process.**
- **Ease request times within the court.**
- **Increase business process turnaround.**

Laserfiche® leverages the power of template searches to create compilations that are ordered correctly but also have bates numbering and appropriate table of contents generated. It is a fast and easy solution to courts that need to digitize this typically paper heavy process.

This dynamic tool will improve processes by reducing request times, business process turnaround and most importantly save money associated with the cost of purchasing, printing and shipping paper.
