

Junxure Integration for Laserfiche

Cities Digital's Junxure Integration is used to link client records from Junxure to Laserfiche® client folders. This integration is complete with a Documents tab in Junxure showing all corresponding client documents from Laserfiche®.

The Junxure Integration contains a robust set of features for document synchronization with Laserfiche®:

- Includes the ability to view all documents stored in Laserfiche® in the documents tab within Junxure.
- Store documents in customized folder structure in Laserfiche®.
- Provides automatic importation of all documents stored on the "P:\\" drive.
- Allows scanning directly from Junxure
- Includes barcode creation via Dymo label printers to automatically file and index documents.

- Automatically apply indexing information to new documents when scanning or importing documents.
- Simplified search interface for finding relevant documents from Junxure.

Email sales@citiesdigital.com or call 855-714-2800x2 for more information about Cities Digital's Junxure Integration.
