

Build Connections with Staff, Customers and the World

Instantly Deployable, Dynamic Web Publishing to Help You:

- ▶ Improve document accessibility without increasing IT workload
- ▶ Maintain security while improving information availability
- ▶ Save staff time and resources by providing self-serve information access

Meet Information Demands with Minimal Software Maintenance and Support

Everyone expects instant answers. But how do you expand document availability without overburdening IT? How do you make documents available to employees, clients or the public while protecting your repository?

Laserfiche WebLink™ is a secure Web-publishing tool that distributes information while keeping it safe. WebLink easily and securely delivers documents to the people who need them via intranet or the Internet. One installation on your Web server delivers easy rollout. WebLink is highly customizable to provide document access that is consistent with the look and feel of your Web site.

WebLink in Action

In government, financial services, health care and other industries, WebLink allows organizations to offer employees and the public necessary documents, saving staff time and minimizing duplication and distribution expenses.

▶ Local Government

Make city council agendas, building permits, accident reports and other documents available online to the public.

▶ Financial Services

Allow authorized personnel to securely search and retrieve new account forms, mutual fund statements, tax returns, loan origination documents, applications, titles and confirmations.

▶ Educational Institutions

Offer searchable catalogues, special collections, student handbooks and public reports.

▶ Healthcare Organizations

Provide employees with secure intranet access to EOBs to improve response time to billing inquiries and accelerate payment cycles.

Deploy Rapidly, Integrate Easily

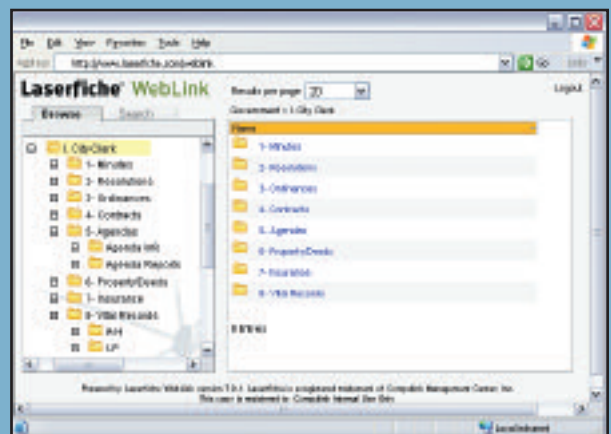

WebLink is designed to deploy instantly organization-wide. A true thin-client, WebLink allows IT to roll out wide access without creating an installation or maintenance burden. WebLink also integrates seamlessly with existing Web applications to present a consistent look and feel to staff and customers.

- ▶ Install software only once on your Web server for fast rollout.
- ▶ Access a library of ASP.NET Web controls for drag-and-drop Web page customization.
- ▶ Non-technical staff benefit from dynamic Web publishing without HTML coding.
- ▶ Integrate smoothly with applications, such as GIS, CRM and others, to provide access to supporting documentation.

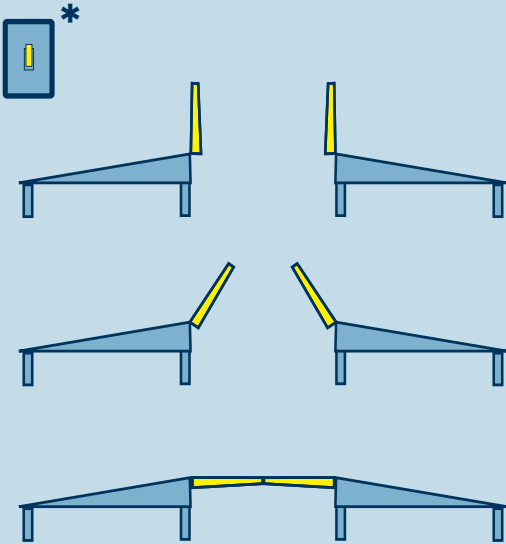

The Right Tools for the Right Job

WebLink accommodates diverse needs to enable your entire organization to work more effectively. Users locate documents with a variety of search options, including browsing folders and full-text searches. An individually customizable interface allows index information to be displayed in the most efficient way for specific user needs.

- ▶ Locate relevant documents easily with key words displayed in lines of context.
- ▶ Pinpoint information quickly within documents through highlighted search terms.
- ▶ Export images to PDF format for high-quality printing and easy distribution.

WebLink provides a straightforward folder-browser view as

*With a single installation, WebLink connects you securely with remote offices, customers and, when appropriate, the public.

Balance Access and Security

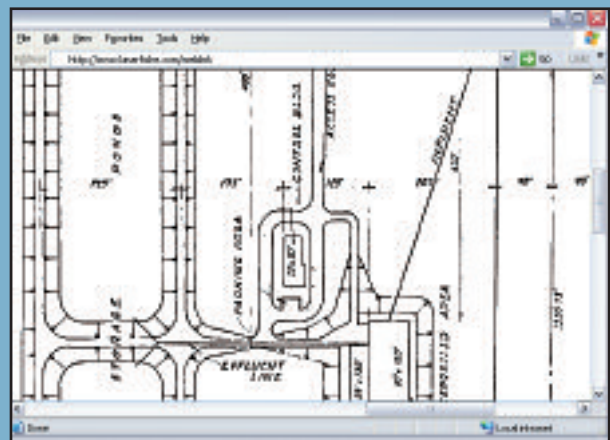

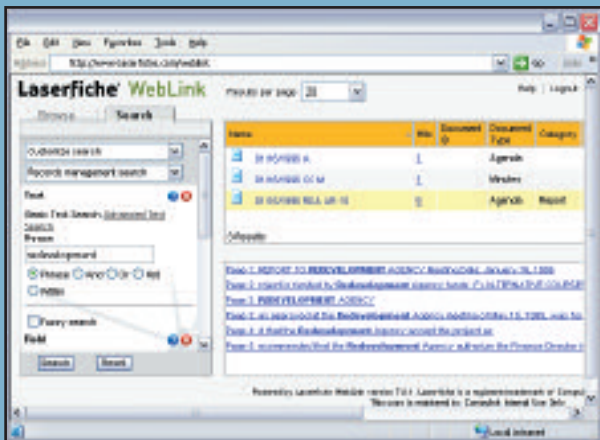

Repository security is never in question. Designed to protect the core repository, WebLink prevents users from altering, deleting or tampering with your documents. System administrators decide which folders and documents are available over the organization's intranet or the Web. Redaction offers additional, word-level security. Sensitive information remains protected while documents are available to authorized users.

Internet Benefits

- ▶ Publishing documents to the Web is as easy as dropping documents into a Laserfiche folder.
- ▶ Present a consistent face to customers and the public with a customizable interface that matches your Web site.
- ▶ Administrators retain strict control over which documents are publicly available.
- ▶ Protect your repository's integrity with read-only document access.
- ▶ The public enjoys self-serve information access, freeing your staff to focus on mission-critical business.
- ▶ Platform and browser independence allows users to view documents on a wide variety of Internet browsers, operating systems and hardware.

Intranet Benefits

- ▶ Deploy document access across your organization while installing and maintaining software on only one computer.
- ▶ Users can be required to log in, limiting their access to only those documents they need to do their jobs.
- ▶ Staff find information based on what they know, by browsing folders or searching for index information, words or phrases.
- ▶ Users can configure their individual interfaces to adapt to their work needs.
- ▶ Easily integrate document access with your other intranet applications using WebLink's ASP.NET Web controls.

well as full-text and other advanced search options to quickly pinpoint information.
